LATTICE

Take on the work.
Keep your floor focused.

Lattice helps domestic machine shops fulfill overflow and out-of-capability jobs through qualified CNC machining and fabrication partners in China. Access additional production capacity without adding machines, staff or floor space.

YOUR SHOP. MORE POSSIBILITIES.

Keep the customer relationship

With a full pipeline, shops either reject work or bid excessively long lead times. Route overflow work through Lattice and keep the customer relationship.

Quote beyond your current capacity

Offer customers machining and fabrication capabilities beyond the equipment, materials or labor available in your shop.

ONE PARTNER, FROM REQUEST TO DELIVERY

1 — 2 — 3 — 4 →

Share requirements

Upload drawings and CAD files. Specify quantities, material and quality requirements, and your target delivery date.

Review the quote

Review the quote provided by our manufacturing partners based on your project requirements and their capacity.

Approve production

Lattice coordinates with the supplier and tracks progress against the agreed production plan.

Review quality

Review inspection and material records against your requirements before shipment.
